NTT DATA

Five benefits of moving your team collaboration to the Cloud with Cisco and NTT

1. Meet and collaborate from anywhere, on any device

In today's modern workplace, organizations look to leverage the cloud to provide great collaboration technologies to connect globally distributed teams. Cisco Webex provided by NTT Ltd. is designed to allow users to easily collaborate and communicate no matter which device or location they are connecting from, without ever needing to meet in-person.

2. Ease of management and analytics

As the amount of data shared increases and becomes more complex, companies are challenged to store and collect this data effectively. Cloud collaboration solutions offer the ability to collect data and pull in-depth reports on users, devices and conference room usage. Cisco Webex Control Hub offers a holistic view of all Cisco Webex services, enabling IT workers to manage users, provision devices, view analytics and reporting, and configure security and compliance policies. Our adoption services can help you and your team master these tools.

3. Enterprise-level security

Security is a primary concern of companies when transitioning to the cloud. Security is a top priority at Cisco and NTT Ltd. in the design, development, deployment, and maintenance of its networks, platforms, and applications, and have enabled security, privacy and encryption protocols to provide a secure collaboration experience at the office as well as on-the-go.

4. Flexibility and scalability

Cloud collaboration solutions are built to easily scale to an organizations' usage needs with little adjustment, without the need to purchase additional hardware to support a fluctuating business. Cisco Webex cloud infrastructure and NTT Ltd.'s Universal Calling Plans are available to be implemented as needed with minimal work. The cloud capacity allows our customers to flexibly scale up and down based on their business demands while optimizing resources and overall.

5. Interoperability and real-time integrations

Security is a primary concern of companies when transitioning to the cloud. Security is a top priority at Cisco and NTT Ltd. in the design, development, deployment, and maintenance of its networks, platforms, and applications, and have enabled security, privacy and encryption protocols to provide a secure collaboration experience at the office as well as on-the-go.

CISCO

Cloud migration is no small undertaking; however, the advantages are great. Cloud video conferencing solutions enable users to collaborate at any time, from anywhere, to not only get their work done but to boost their productivity. Cisco Webex provided by NTT Ltd. provides flexible deployment models, allowing clients to select the best migration path based on their business needs and priorities. NTT Ltd. is committed to enabling our customers to access the latest cloud features and innovations while maintaining existing on-premise investments.
